Why Unified Signal?

We know Service Enablement

Unified Signal has over 26+ years of experience in wireless and 16 years with fintech. We have launched over 150 brands and onboarded well over 2 million customers over the last 2 decades.

We've done the hard work

We're your one-stop-shop for expanding your brand into many different services. By choosing to work with Unified Signal, you can save on time and resources in implementing fintech, wireless, international long distance calling, music streaming, merchant processing, payroll, loyalty & rewards payouts, and all through a single source provider.

We're a safe bet

Developed first for the U.S. Department of Defense as a way to securely move money in conflict zones, our white label billing platform meets the highest levels of security and has been implemented and used by top enterprise companies world-wide.

We know how you'll win

We help our clients ideally launch and make the most out of our white-label services. Your stores, business centers, and current offerings are built-in marketing tools to promote these new services, which will add massive value to people in every spectrum of life from low income, no-credit history, and immigrants to highly banked / overbanked consumers.

Benefits to Your Brand

**Generate \$4-\$20
incremental profit
per customer per
month**

**Enhance
customer
loyalty**

**Significantly reduce
or eliminate credit
card merchant
processing fraud**

**Drive
incremental
store or web
traffic**

**Better data and
customer insights**

**Increase product
diversification
and brand equity**

**Reduce employee
turnover and payroll
costs and increase
employee satisfaction**

**Reduce / eliminate
credit card merchant
processing fees**

Why Choose Unified Signal?

- Generate an additional \$4-\$20 per subscriber per month in incremental net profit.
- Offer your customers better deals on value added products and services to promote your brand loyalty.
- Increase in-store and in-app traffic to help improve customer satisfaction and drive incremental foot traffic into stores.
- Remove the cost of collecting subscriber payments and reduce or even eliminate consumer fraud.
- Significantly reduce payroll costs and freely process commission payments to your customers, distributors, employees, and supplier ecosystem.
- Increase market penetration by launching powerful referral programs to increase subscriber engagement.
- Enter the money remittance market and capitalize on domestic and international money movement. Move money in real time to 80% of the world's population at a fraction of the cost or even for FREE.
- 26+ Year history of enabling successful enterprise companies: Microsoft, ESPN, Organo, OGPAY / ODC, UPFI, GFT, Game Time Wallet, Venti Global, Beyond Wallet, AllFi, DNERO, Mexfon, ADX, Pegasus and many more.

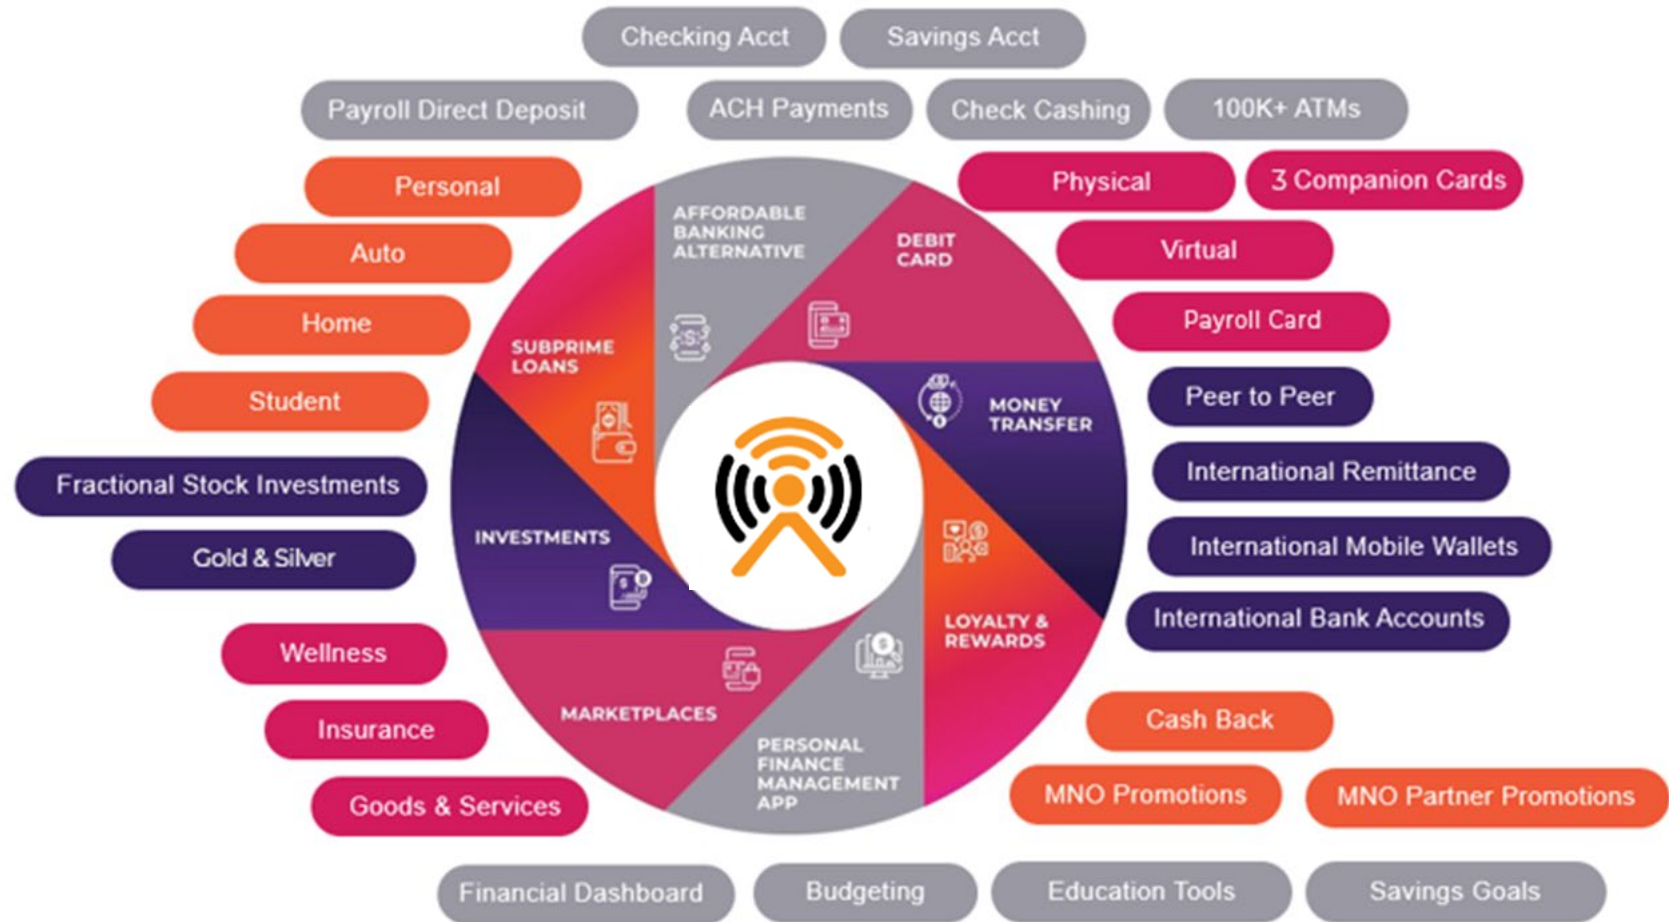

Complete Turnkey Ecosystem

THE FUTURE OF YOUR BRAND

- With a Unified Signal partnership, you will be well positioned to build an entire platform of services to significantly increase market differentiation and profitability.
- Clients can compete and win customer loyalty by using the power of their brand to provide value added services to their customers which will save them time and money.
- Clients can pick and choose what services to launch.
- Clients can add their existing products and services into our ecosystem.

Target Demographic 1:

**Low-income / underbanked /
Non banked customers**

The Federal Reserve estimated there were **20% of US households** are underbanked and **4.5% / 5.9 Million** people are actually unbanked.

This demographic has more difficulties making online purchases as well as paying for goods and services in physical locations.

Problems faced:

- Subject to high fees for bank accounts and overdrafts, check cashing, payday loans, interest on credit cards, etc.
- Poor or no credit so unable to get loans, make big-ticket purchases or one-time shocks (medical emergency, car breakdown, etc.).
- Expensive and time consuming to make money transfers to friends and family, especially to those outside of the U.S..

How Unified Signal helps its clients:

Our clients can launch advanced digital banking and payment services for the underserved and underbanked community.

By implementing the Unified Signal white label platform, clients can:

- Enter the cross-border payments market.
- Offer a secure method to quickly purchase goods and services online protecting consumers and their money.
- Significantly reduce the costs of processing credit cards as well as virtually eliminating credit card merchant processing fraud.
- Enhance customer engagement with targeted offers and loyalty programs.
- Offer customers value added services such as a marketplace where customers can buy things that normally there were not able to in the past because of their non-banking status: Flights, Rental Cars, Hotel Bookings.

Target Demographic 2: **Perfectly Banked Customers** **(US & International) as well as** **Kids & Elderly**

Approximately 80% of US households are properly banked.

International customers coming into US have high costs to convert local currency into USD to buy goods and services at physical locations.

73 Million kids in US of which 50% or more are at the age where they can purchase goods and services.

Problems faced:

- Consumers are riddled with bad actors from all over the world whose sole mission is to steal as much money as they can from unsuspecting customers. Customers need to keep their private banking information off the web.
- International customers are subject to high fees to convert local currency into USD and vice versa.
- Parents find it difficult to provide kids with a debit card.

How Unified Signal helps its clients:

Our clients can launch advanced digital banking and payment services for the banked market segment and which creates a financial firewall between customers and hackers.

By implementing the Unified Signal white label platform, clients can:

- Offer a secure method to quickly purchase goods and services online protecting consumers and their money.
- Significantly reduce the costs of processing credit cards as well as virtually eliminating credit card merchant processing fraud.
- Enhance customer engagement with targeted offers and loyalty programs.
- Provide kids and elderly with a SAFE and SECURE fintech solution inclusive of making it safe to buy products and services online.

Fintech Suite of Services

Mobile Wallet / Debit Card Enablement

- Global white-label fintech platform available in **15 languages**.
- Private label **mobile wallet**, **physical debit card**, **virtual debit card**, and up to **3 personalized companion cards** (all with separate account balances for increased security). Also launch a private label **worldwide non reloadable non-KYC virtual card**.
- **Full Private Label** UI integration **or** Implement our **300+ JSON APIs**.
- Move funds in **real time anywhere in the world and even for FREE**.
- **\$0 Transaction Cost** Payroll program in over 40 countries.

Merchant Processing

- Enable customers to quickly and securely pay for your products and services using money stored on their mobile wallet / debit card.
- **No** credit card transaction fees. **No** merchant processing fraud.
- Receive money from customers **in real-time** vs waiting for 3-4 days for funds to clear.
- **Speed up** time to process transactions by 50%.
- Security: **Securely** authorize transactions using proprietary mobile app third party authentication as well as biometric authentication. Customers never need to provide any proprietary credit card / banking information which can later fall into the wrong hands.

**Private label mobile application
or
Full API suite to build your own custom app**

3 Account Balance System

Mobile Wallet Balance:

- All Mobile Wallet accounts are “off network” and completely secure and can be set up to payout an APR to customers. Most clients pay out 2% to 3% APR which is 2x to 3x what traditional banks offer.
- There are no monthly costs or fees for mobile wallet accounts and we recommend clients do not charge customers as well.
- Customers can move money to any other wallet holder on our global network for FREE and in real-time.
- Customers can move money to their virtual and physical debit cards as well as companion cards anywhere in the world for FREE and in real-time.

Reloadable Virtual Debit Card Balance:

- Recommended Use Case: Ideal for online purchases up to \$20,000. Customers should maintain a minimal or preferably zero balance on this account and only transfer the necessary funds from their Mobile Wallet Account to their virtual debit card just before making an online transaction. All transfers from mobile wallet to virtual debit card are always FREE and completed in real-time. This money movement strategy eliminates any financial exposure when hackers attain peoples credit card information. They see a \$0 balance and move on to their next victim. Now your customers can shop online without the risk of providing their sensitive credit card or banking information to the public web and all funds on the virtual debit card are FDIC insured. We call this our **‘Financial Firewall’**.

Reloadable Physical Debit Card Balance:

- Because the physical debit card is chip and NFC tap to pay enabled, the security on use is much higher, so customers can keep smaller balances on their physical debit card. Customers can again FREELY transfer money from their Mobile Wallet Account to their Physical Debit Card in real-time and for FREE, so your customers still don’t need to store large amounts of money on their physical debit card in case it gets lost or stolen. If their card is lost, stolen, or compromised, they can suspend their card in seconds with our award-winning mobile app and even move back all the funds from their physical debit card to their mobile wallet account in seconds. This ensures the safety, security, and integrity of your customer’s money. All funds on their physical debit card are again FDIC insured.

Companion Cards

Customers can add up to 3 personalized companion cards for family and loved ones. Companion cards can be used anywhere in the world. Great product for kids, elderly, and family members abroad. Users can securely buy goods and services online and not worry about their banking information getting into the wrong hands. Send money to companions cards in real time and for FREE. Customers can even monitor their companion card transaction history.

Worldwide mobile wallet with multi-currency multi-lingual support

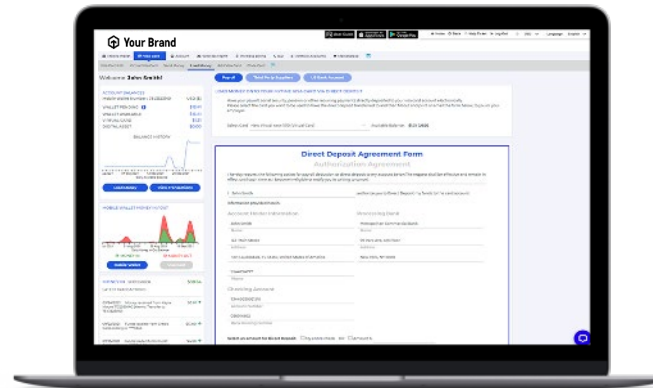

Customers can set their fiat currency to any major currency offered around the world. The system supports 100+ fiat currencies and 15 languages. Additional languages can be added upon request.

Mobile Wallet Account

The customers mobile wallet account acts as a virtual bank account which can earn interest as high as 3% APR. Offer your customers a complete banking solution linked to an optional virtual and physical debit card.

Offer your customers an alternative banking solution and save them all their banking fees and additional charges for NSF.

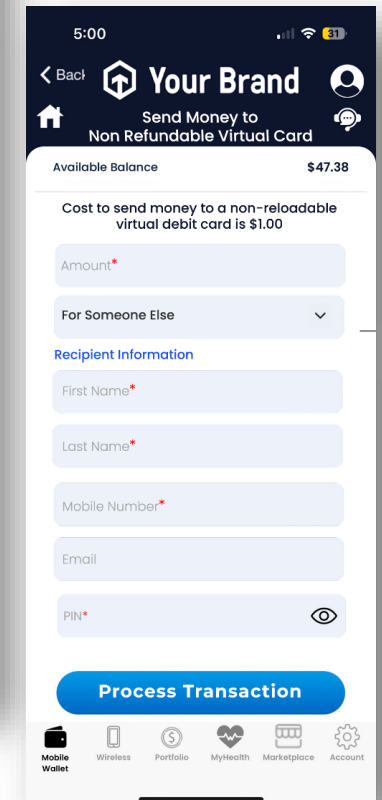

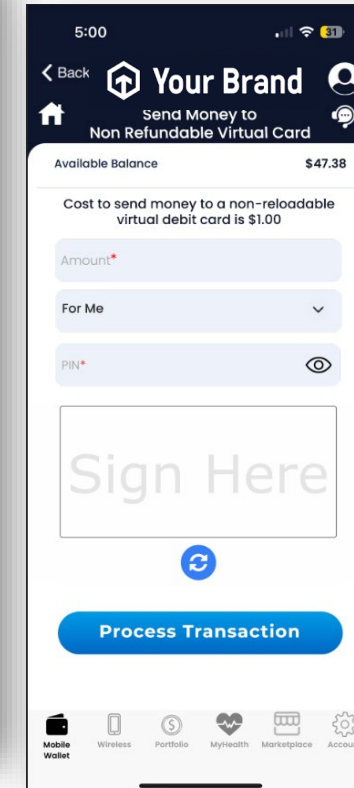

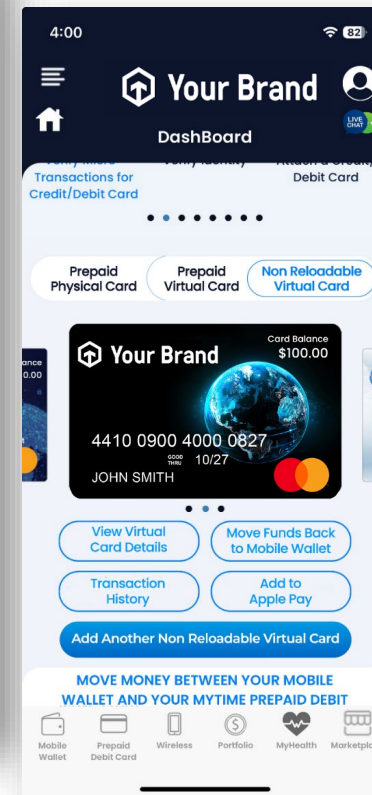

Micro loans / Product Financing

Clients can offer their customers micro loans ranging from \$1,000 to \$100,000. Customers receive funds instantly on their debit card and agree to simple payback terms. Great for helping customers with financing larger purchases or helping bridge customers until their next payroll hits.

Non-Reloadable Virtual Card

- Clients can launch a Global private label non-KYC non reloadable virtual card.
- Clients can now pay commissions, rewards, payroll, and royalties to anyone around the world. This can be done one a time, via JSON API, or in batch using a CVV file.
- Recipients all receive a FREE mobile wallet to go with their virtual debit card.
- Recipients can move money from their non reloadable virtual debit card to their mobile wallet for FREE and in real time.
- Recipients can quickly access their funds and Send to any bank account, Zelle, push to debit card, PayPal, Venmo, and even withdraw money at supported ATMs.

1099 / W2 Payroll Services

Employee Benefits

- Employees receive funds on mobile wallet or debit card 2-3 days early.
- Instant access to wages.
- Mobile app to manage money.
- Access to marketplace (Best Buy, Groupon, & Priceline) and up to 25% off products and services through instant rebates to mobile wallet account.
- Access to Portfolio section where employees can buy / sell: gold, silver, and stocks.
- Customers earn 2% to 3% APR on all funds in their mobile wallet, which is 5X what can be earned with any standard bank account.
- Employees can use mobile wallet to pay bills and purchase goods and services on-line creating a financial firewall between online merchants and your employee's confidential banking information.

Employer Benefits

- Access to management portal to securely manage employee payroll accounts including the creation of mobile wallet / debit card accounts.
- Pay any 1099 payments at NO COST.
- Pay all W2 payments including withholdings at a significant savings over traditional payroll companies.
- Freely pay end consumers economic rewards in batch or in real time with 1 simple API integration.
- Easy to manage and flexible reporting.
- Improved employee productivity, satisfaction, loyalty, and retention.
- Manage payroll in over 40 countries, in 100 currencies, and 15 languages.
- State of the art AI security and funds are FDIC insured.
- Private label mobile wallet and debit card program.

Security / Anti-Fraud System

OUR SOLUTION IS BUILT FOR MAXIMUM SECURITY

We protect you and your customers

Reliable and Secure Platform:

- Secured by AFIDS which is a state-of-the-art AI based security system.
- Utilizes secure encryption technology.
- Anti-fraud protection.
- App secured with username / password, SMS MFA verification, and support for fingerprint, vein, facial, and/or PIN recognition.
- Latest PCI 3.2.1 compliance certification.
- All customer and employee funds on debit cards are FDIC insured.
- Anti DDOS and Bot protection from Cloudflare and AWS.
- 26+ years in production, millions of transactions a day, 350 million plus attempted hacks, 0% success rate.

Use funds on your virtual card to buy goods and services online. Try to keep as close to a \$0 as possible on the card and move funds from your mobile wallet to your virtual card only when you wish to buy something. This way if your card information is compromised, then your funds are secure. This creates a "Financial Firewall" between you and online merchants. This card is issued by Sutton Bank, Member FDIC, pursuant to license by Mastercard.

Use funds from your physical card when buying goods and services at a retail location. Also use this card as a funding source for Apple Pay, Samsung Pay, Amazon, PayPal and Venmo. You can keep a higher balance on this card as it is being used only by trusted sources or physical retail locations. This card creates a "Financial Firewall" between you and merchants. This card is issued by Sutton Bank, Member FDIC, pursuant to license by Mastercard.

The MyTime Prepaid Debit Card requires that we validate your identity. This validation is FREE of charge and does NOT affect your credit. The max balance allowed on each card is \$20,000.

Personalized Card with ID Verification (\$20,000 max balance)
If you wish to enroll in our MyTime Prepaid Debit Card and require a balance greater than \$500 and/or need to load funds with a credit card or savings/checking account, then we will need to validate your identity. This validation is free of charge and does not affect your credit. The max balance allowed on this program is \$20,000.

Mobile Application Dashboard

- Customer Dashboard is available on our private label mobile application.
- Allows customers easy access to all the functions that they need to use all in one simple screen.
- Easy navigation to most used functions.
- Mobile App is completely private label and rules based and customizable.
- Dashboard is broken down into sections or what we call 'Widgets'. The Main dashboard is completely configurable including the choosing and custom sorting of available dashboard widgets. Choose from over 12 existing Widgets including: Quick Links, Send / Load Money, Debit Card, Recent Transactions, Badges, Money In and Out Graph, Account Balance Graph, and Refer a Friend, and even a Collect customer payments widget.
- Clients can also create their own custom widget and implement in days. You think it... We build it...

- Load cash funds to the customers Debit Card in over 100,000 locations across the US including grocery stores, Target, CVS, Walgreens, & 7-11. Customers can withdraw money at virtually any ATM worldwide.
- Customers can load / offload funds directly to their mobile wallet via ReadyCode (formerly NCR 360) at 55,000 ATM locations worldwide.
- Mobile wallet users can send funds for Domestic Cash Pick Up at over 300,000 approved locations around the world including over 100,000 US locations.

Cross Border Payments

International Money Remittance through our MCN (Mobile Clearinghouse Network)

- Compete in the international money remittance space and capitalize on the \$150 trillion-dollar industry.
- Customers can move money to friends and family all over the world in real time and at a fraction of the cost of traditional cross border payments processing. Connect to over 80% of the world's population including global mobile wallets.
- Money can go right to customer vs having to pick up funds at a designated location or customers can choose to pick up money at over 300,000 designated locations all around the world.
- Customers can move money with their cellular phone vs traveling to a retail location which is much safer.
- Unified Signal has created the MCN (Mobile Clearinghouse Network) which now has hooks into virtually any bank account around the world, MoneyGram, as well as other mobile wallet technologies such as: Union Pay, PayPal, Venmo, Alipay, MPESA, and even wireless accounts across the world.

The screenshot shows the 'Your Brand' mobile app interface. The top navigation bar includes links for Home, Back, Help Ticket, Log Out, USD, Language, and English. The main menu includes Wallet, Prepaid Debit Card, Account, Wireless Mgmt, Wireless Billing, Portfolio Accounts, Home, MyHealth, and Marketplace. The 'Send Money' screen displays account balances (Mobile Wallet Number: 7543323910, USD (\$), Mobile Wallet Available Balance \$0.55, Prepaid Physical Card \$2.00, Precious Metals \$1.79) and account status (Mobile Wallet Account: 7543323910, Suspend). The MCN (Mobile Clearinghouse Network) section shows a 'MOVE MONEY GLOBALLY WITH MCN' screen with options for New Transaction, Existing Recipients, and Transaction History. The 'Select Country' dropdown is open, showing a list of countries including Anguilla, Antarctica, Antigua and Barbuda, and Argentina.

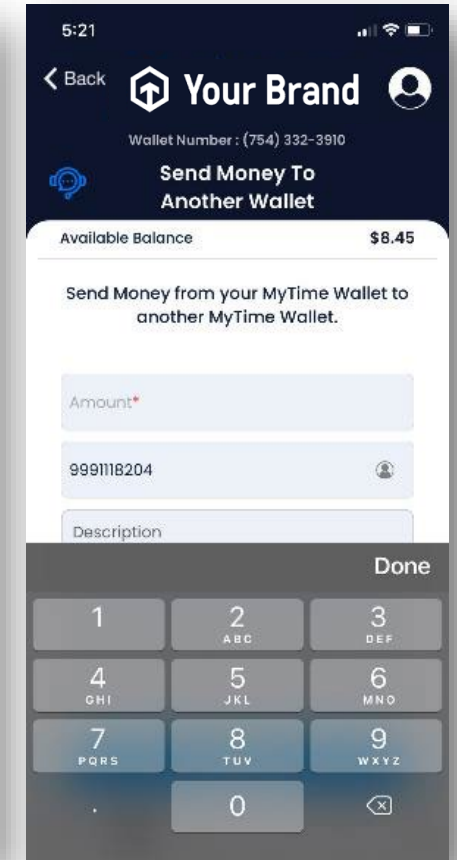

The screenshot shows the 'Your Brand' mobile app interface, specifically the 'MOVE MONEY GLOBALLY WITH MCN' screen. The screen displays the 'New Transaction' option selected. The 'Select Country' dropdown is set to 'Argentina'. The 'Select Payment Method' dropdown is set to 'Bank Account'. The 'Transfer Amount' field is set to '100.00'. The 'Back' button is visible. Below the transfer screen, a table titled 'CHOOSE PAYMENT NETWORK' is shown, listing various payment networks and their associated fees and costs.

SELECT	PAYMENT NETWORK	MAXIMUM TRANSFER AMOUNT	TRANSFER FEES	TOTAL COST	FxRate	RECIPIENT CURRENCY	RECIPIENT RECEIVES
	MCN	\$50,000.00 USD	\$3.00 USD	\$103.00 USD	FxRate : 990.00ARS	ARS	99000.00 ARS

Buttons: Back, Continue

Send / Receive Funds via QR Code

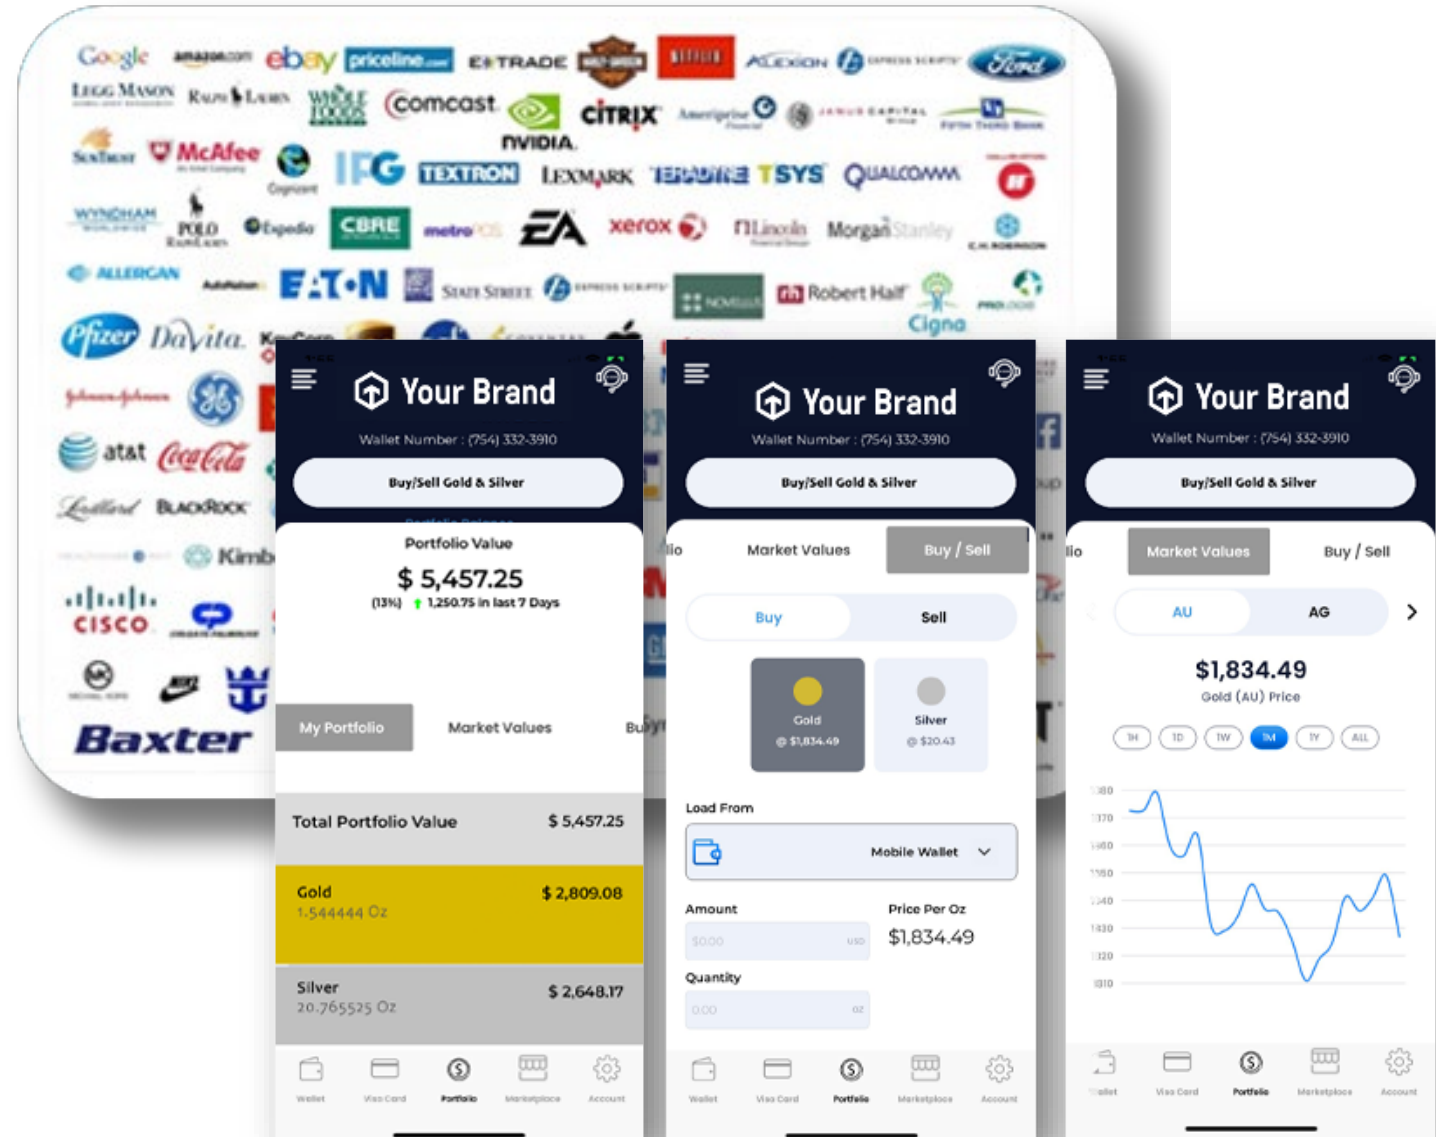

- All customers receive a unique QR code.
- Customer or merchant can print their QR code or allow other people to scan their QR code on their phone to quickly and easily send them money.
- Customers can scan these unique QR codes and instantly send money to people.
- All funds are delivered for FREE and in real-time.
- Great for smaller merchants, dealers, servers, bell boys, taxicab drivers, and any environments where tips are paid out.

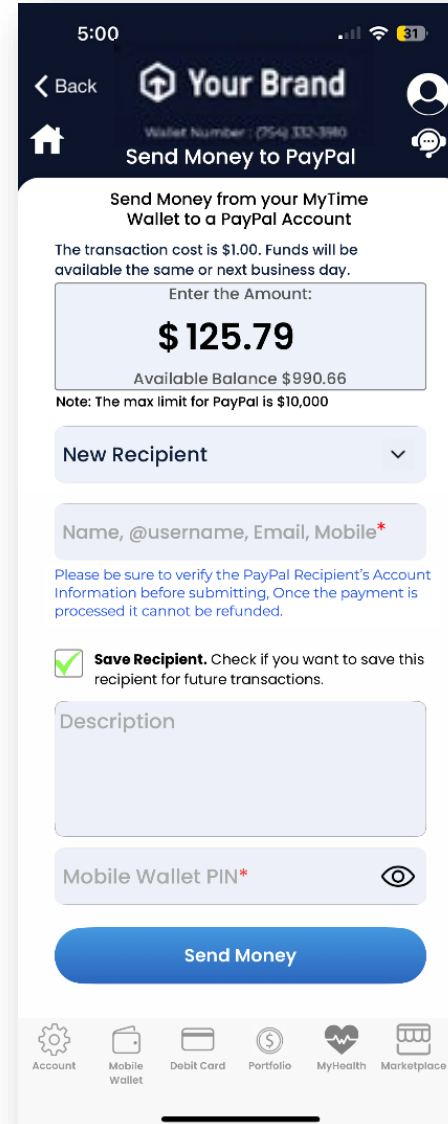

Portfolio: Buy / Sell

- Customers can buy gold and silver as well as stocks.
- All sell transactions are processed in real time.
- Funds sent to mobile wallet or debit card.
- Easy Interface for customers.
- Fractional stock trading.
- Enables any merchant to accept gold and silver or stocks as a payment method.
- Offloading money to Gold and Silver is great for customers that live in hyper inflation countries.

Send to PayPal / Venmo

- Mobile Wallet Users now have the ability to send money from their available Mobile Wallet Account Balance to a Verified US PayPal Account Holder where the recipient will receive the funds in minutes.

Merchant Payment Processing

Merchant Payment Processing with Mobile Wallet and Credit Card:

- Compete with Stripe, Square, PayPal, and other merchant processors.
- Customers can pay for your goods and services using their mobile wallet with NO merchant processing fees. Save 4% to 6% in expensive credit card processing fees.
- GUARANTEED NO FRAUD / BAD DEBT through mobile wallet transactions.
- Receive your money in real-time. No more waiting for 2-4 banking days for funds to clear to your bank account.
- Deploy using existing desktop, tablet, and mobile app or integrate into your existing payment system using simple APIs.
- Customers never need to provide their credit card information, which eliminates potential hackers from illegally stealing proprietary customer data, making customers more confident to purchase your goods and services.

The screenshot shows the 'Your Brand' mobile application interface. At the top, there is a dark blue header with a hamburger menu icon, a headset icon, and the text 'Your Brand'. Below the header, the text 'Wallet Number : (754) 332-3910' is displayed. The main content area is titled 'Kid Mobile Customer Payment Processing'. Below this title, there is a section with a blue circular icon containing a person and the text 'CUSTOMER TYPE'. This section contains two options: 'New Customer' with a person icon and a plus sign, and 'Mobile Wallet Holder' with a wallet icon containing a dollar sign. The bottom navigation bar features six icons: a prepaid debit card, a wireless signal, a portfolio, a heart with a pulse line, a marketplace, and an account.

Video Recognition and Payment

EyeQ Video Recognition and Merchant Payment Processing Module

- Our video recognition is built on a stack of 8 layers of artificial intelligence, machine learning, and enabling technologies. Our AI search recognizes products in milliseconds through our use of the most cutting-edge learning algorithms and scalable computing:
 - Neural networks architecture
 - KNN pattern matching algorithm
 - Custom-built machine learning models
 - Scalable serverless searching
 - Real-time video streaming
- Client Benefits Include: Significantly reduce merchant processing costs, increase security around transaction, reduce to eliminate consumer fraud, enhance marketing differentiation, increase customer brand loyalty, and enhance overall communications with your customers EyeQ Video Recognition Process Flow:
 - Clients create triggers (informational or payment) and upload pictures and video to our AI / machine learning neural net.
 - System “learns” to recognize the uploaded pictures or videos.
 - Users capture video which then identifies uploaded video or pictures.
 - Consumer is presented an informational or payment trigger.
 - If informational trigger, then customer is directed to a predesignated client inputted URL where more information is available on the product or service.
 - If payment trigger, customer is immediately presented with the option to quickly purchase the product using funds on their mobile wallet. Customer can purchase product in 3-5 seconds and no confidential payment information exchanges hands. Client or merchant receives funds instantly and any shipping information that is required to fulfill product.

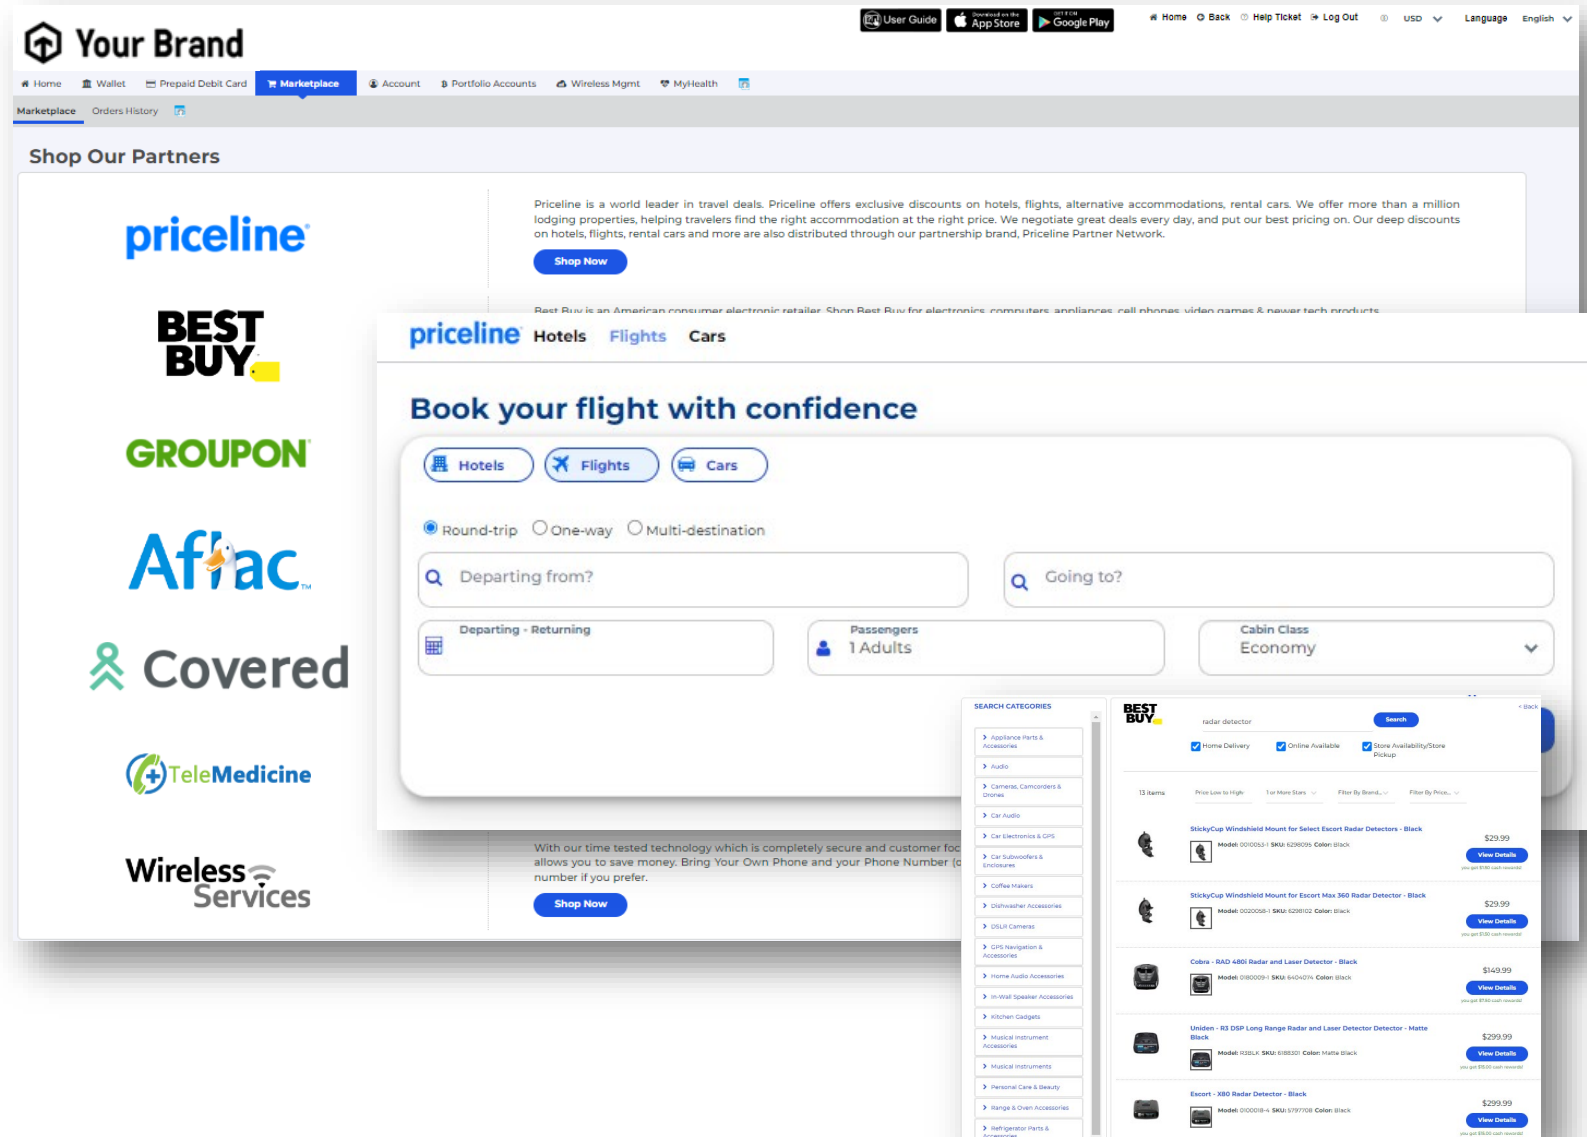

Online Retail Marketplace

Allows customers to buy goods and services from a variety of retailers including: Best Buy, Groupon, Priceline, and more.

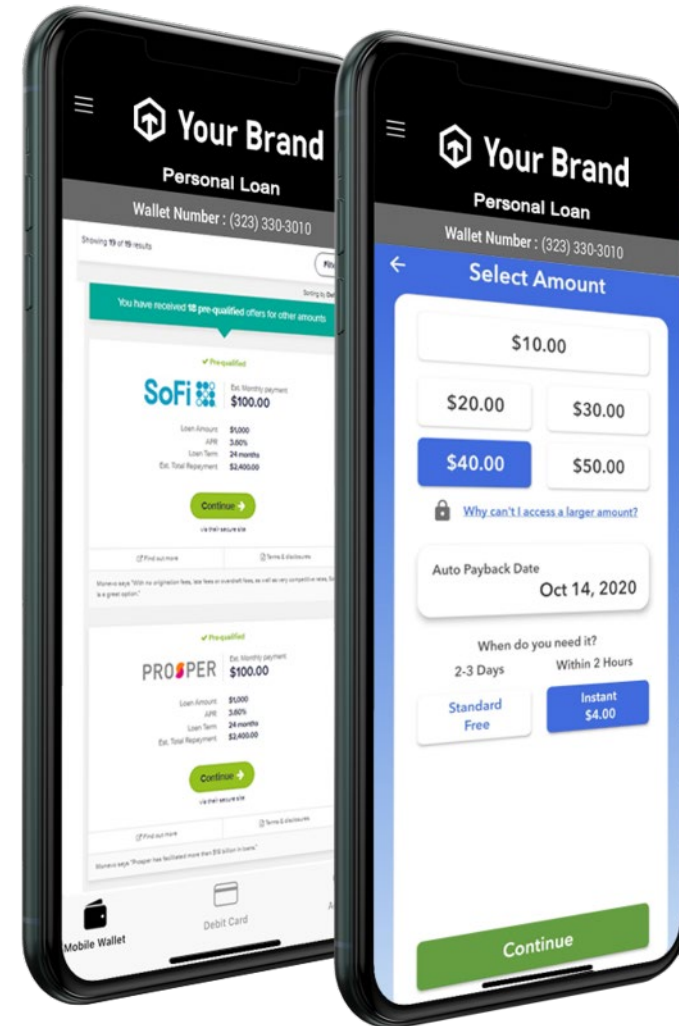

- Customer purchases goods and services at a significant discount to retail by earning rewards on every purchase.
- Customer can have product shipped or pick up at a physical location.
- No credit card or personal information is ever used.
- Customer uses funds from their mobile wallet to pay for goods and services in the Marketplace.
- Transaction takes 3-5 seconds to process and uses state of the art technology to secure the transaction.
- Clients can add their own products and services to the marketplace.

Subprime Loans

- Global low interest personal micro loans.
- Buy now pay later financing for consumer purchases including cellular phones.
- Personal installments ranging from 6 - 24 months.
- Loans vary from \$1,000 to \$100,000.
- Real-time approvals.
- Funds are cleared to customer's debit card or bank account.

How it Works, Simple Solution

MEDICAL

2 Request medical visit

The 'Request medical visit' screen shows a header 'MEDICAL' and a sub-header 'Need expert care quickly for a minor illness or injury?'. Below this is a red button 'Request a Medical Exam'. A list of links follows: 'What we treat', 'Our providers', 'How it works', and 'Prescription policy'.

3 Complete visit intake

The 'Complete visit intake' screen shows a header 'EXAM DETAILS' and a sub-header 'Reason for your exam?'. It prompts the user to 'Select your main reason for seeking care, add notes, contact information for today's exam, and then agree to informed consent.' Below this is a dropdown menu for 'chief complaint' and a text area for 'Please share any notes you would like your provider to know for today's exam.' At the bottom, there is a dropdown for 'select location' and a footer with 'YourBrand@email.com'.

4 Enter waiting room

The 'Enter waiting room' screen shows a header 'AWAITING PROVIDER' and a sub-header 'Thanks for your exam request!'. It features a heart icon with a smile and the text 'Watch for updates. A member of our team is reviewing your exam request and will be in touch shortly.'

5 Meet with your provider

The 'Meet with your provider' screen shows a header 'Your Brand' and a large image of a smiling woman. At the bottom, there are two circular buttons: a red one labeled 'Decline' and a green one labeled 'Accept'.

2 Request therapy visit

The 'Request therapy visit' screen shows a header 'TALK THERAPY' and a sub-header 'Speak with a therapist in as little as 48 hours.' Below this is a red button 'Schedule an Appointment'. A list of links follows: 'What we treat', 'Our providers', 'How it works', and 'Prescription policy'.

3 Select a session date & time

The 'Select a session date & time' screen shows a header 'SELECT APPOINTMENT' and a sub-header 'When would you like to meet?'. It prompts the user to 'Pick the appointment date and time that works best for your schedule.' Below this is a calendar view for February 19th, 2020, with a date picker showing '19' selected. At the bottom, it says 'Sessions are 30 minutes long' and 'Wednesday, February 19th'.

4 Check-in for your session

The 'Check-in for your session' screen shows a header 'APPOINTMENTS' and a sub-header 'Your next appointment is scheduled for 10:00 AM on Mon, February 19'. Below this is a red button 'CHECK IN'.

5 Meet with your therapist

The 'Meet with your therapist' screen shows a header 'Your Brand' and a large image of a smiling woman. At the top, there is a small profile picture of 'JEAN WRIGHT'.
